

THE GLOBAL STRATEGIC PLAN
TO END HUMAN DEATHS FROM
DOG-MEDIATED RABIES BY 2030

ZERO BY 30

Dr Gregorio Torres
World Organisation for Animal Health (OIE)

Foundation

- Rabies Global Conference held in Geneva in December 2015
 - Rabies elimination is feasible: **ZERO BY 30**
 - Global Framework (http://www.oie.int/fileadmin/Home/eng/Media_Center/docs/pdf/Rabies_portal/EN_TimeisnowGlobalFramework.pdf)
 - Business plan
- **OIE Resolution N. 26, 2016.** Harmonise actions and provide adaptable guidance for country and regional rabies elimination strategies
- United Against Rabies (UAR) collaboration by the **Tripartite** (WHO, OIE, FAO) and GARC
- External pro-bono advice
- 28 September 2017: launch of the **Global Strategic Plan for dog-mediated human rabies Elimination**

<http://www.oie.int/eng/RABIES2015/index.html> link

The approach

- Build in what was done
- Theory of change
- Catalyse global change
- United platform to highlight best policies and practices
- Countries in the center
- Resource mobilization
- Communication strategy

For the first time in history, we are united to leverage existing knowledge, tools and technology in a new way.

The phases and objectives

Our objectives for each phase

reduce human rabies risk

- improved awareness and education
- increased access to healthcare, medicines and vaccines
- dog vaccinations

guidance and data

- effective policies, guidance and governance
- ensuring reliable data to enable effective decision making

multi-stakeholder engagement

- demonstrate the impact of activities completed under the United Against Rabies collaboration

ACTIVITIES AND EXPECTED OUTCOMES (EXAMPLE)

Outcome 1.2: rabies is prevented through increased and effective dog vaccination

ACTIVITIES 2017–2020

Leverage existing tools to support effective SOPs for dog vaccination at the country level

Organize regional workshops for coordinators to train in best practices and share lessons learned

Establish a biological bank to increase access to affordable dog rabies vaccines

Support effective use of monitoring and surveillance data to validate vaccination coverage

Promote innovative approaches to enhance dog vaccination campaign coverage

EXPECTED OUTCOMES 2020

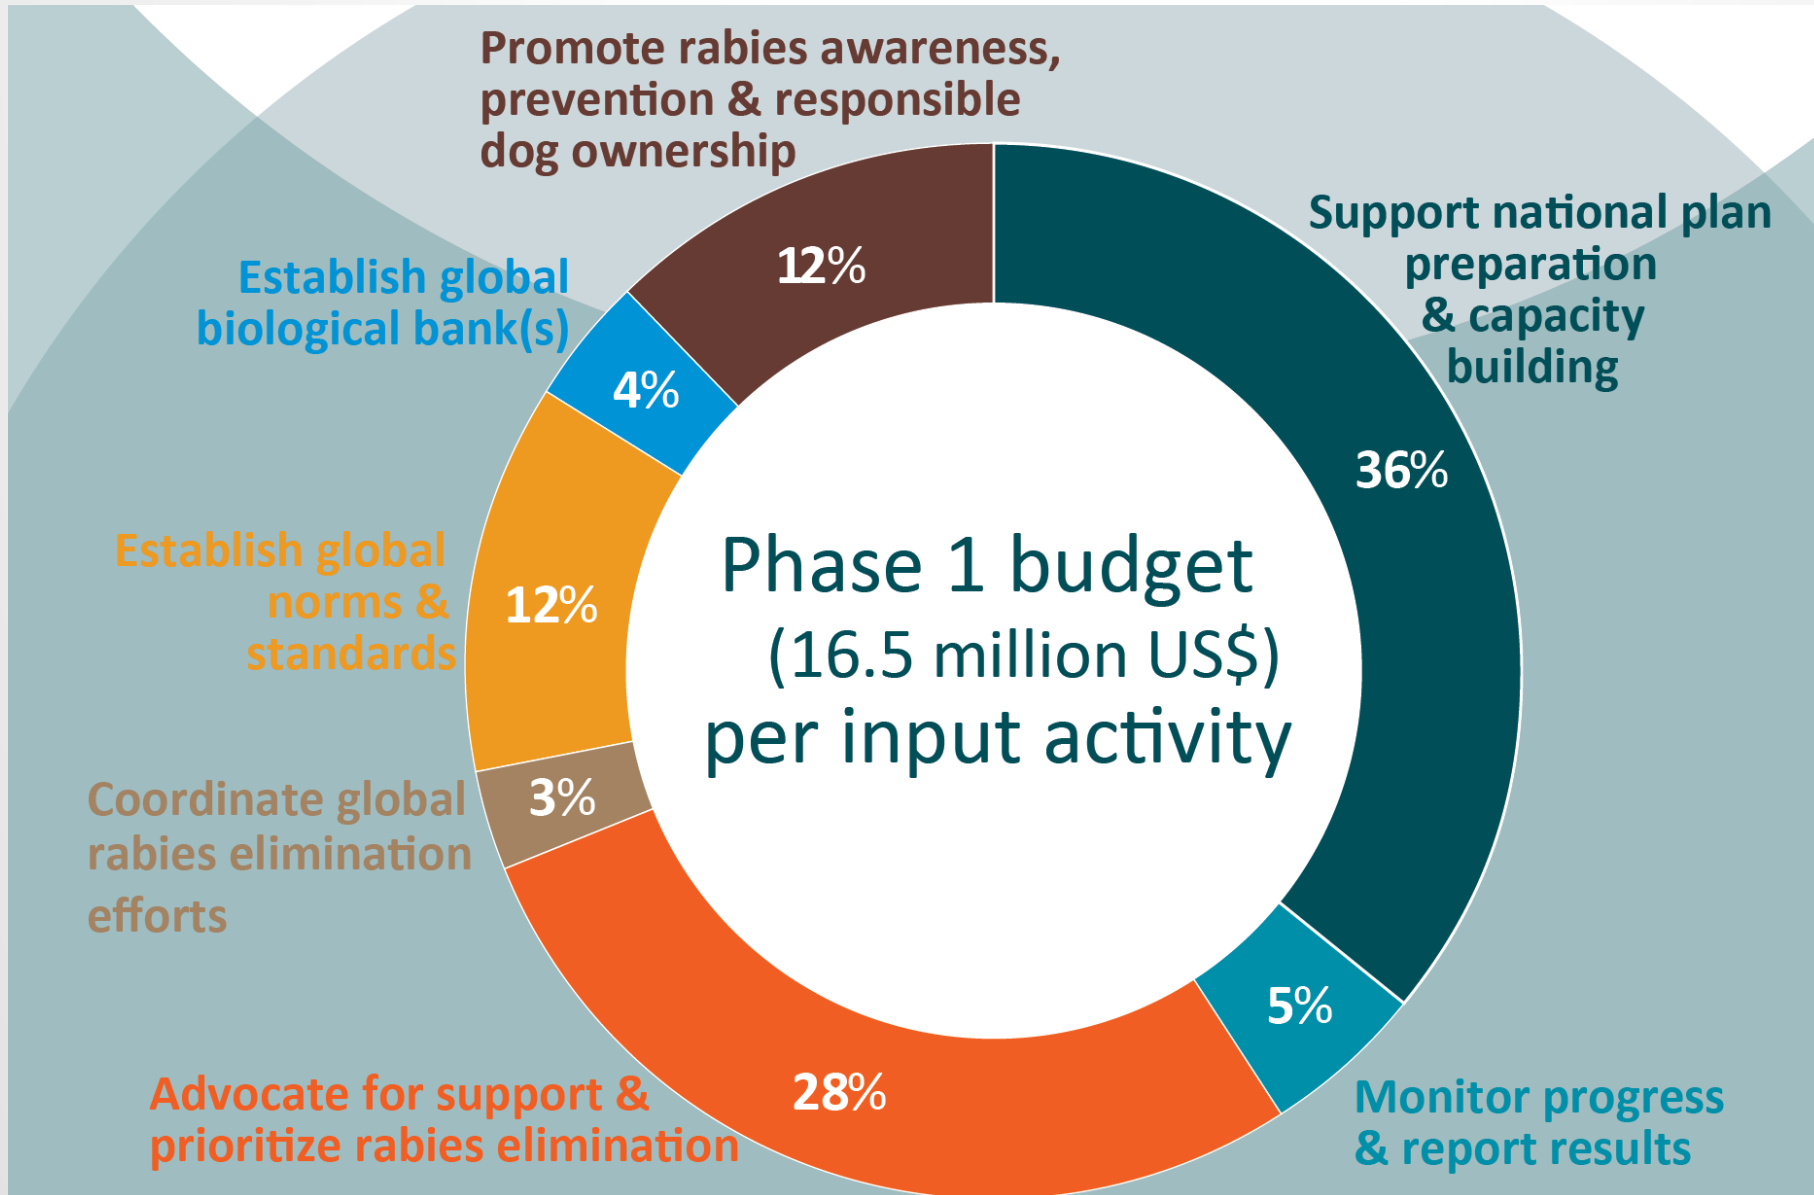

Coherent, standardized, evidence-based tools and strategies for effective dog vaccination

Strengthened, vitalized and supportive regional networks

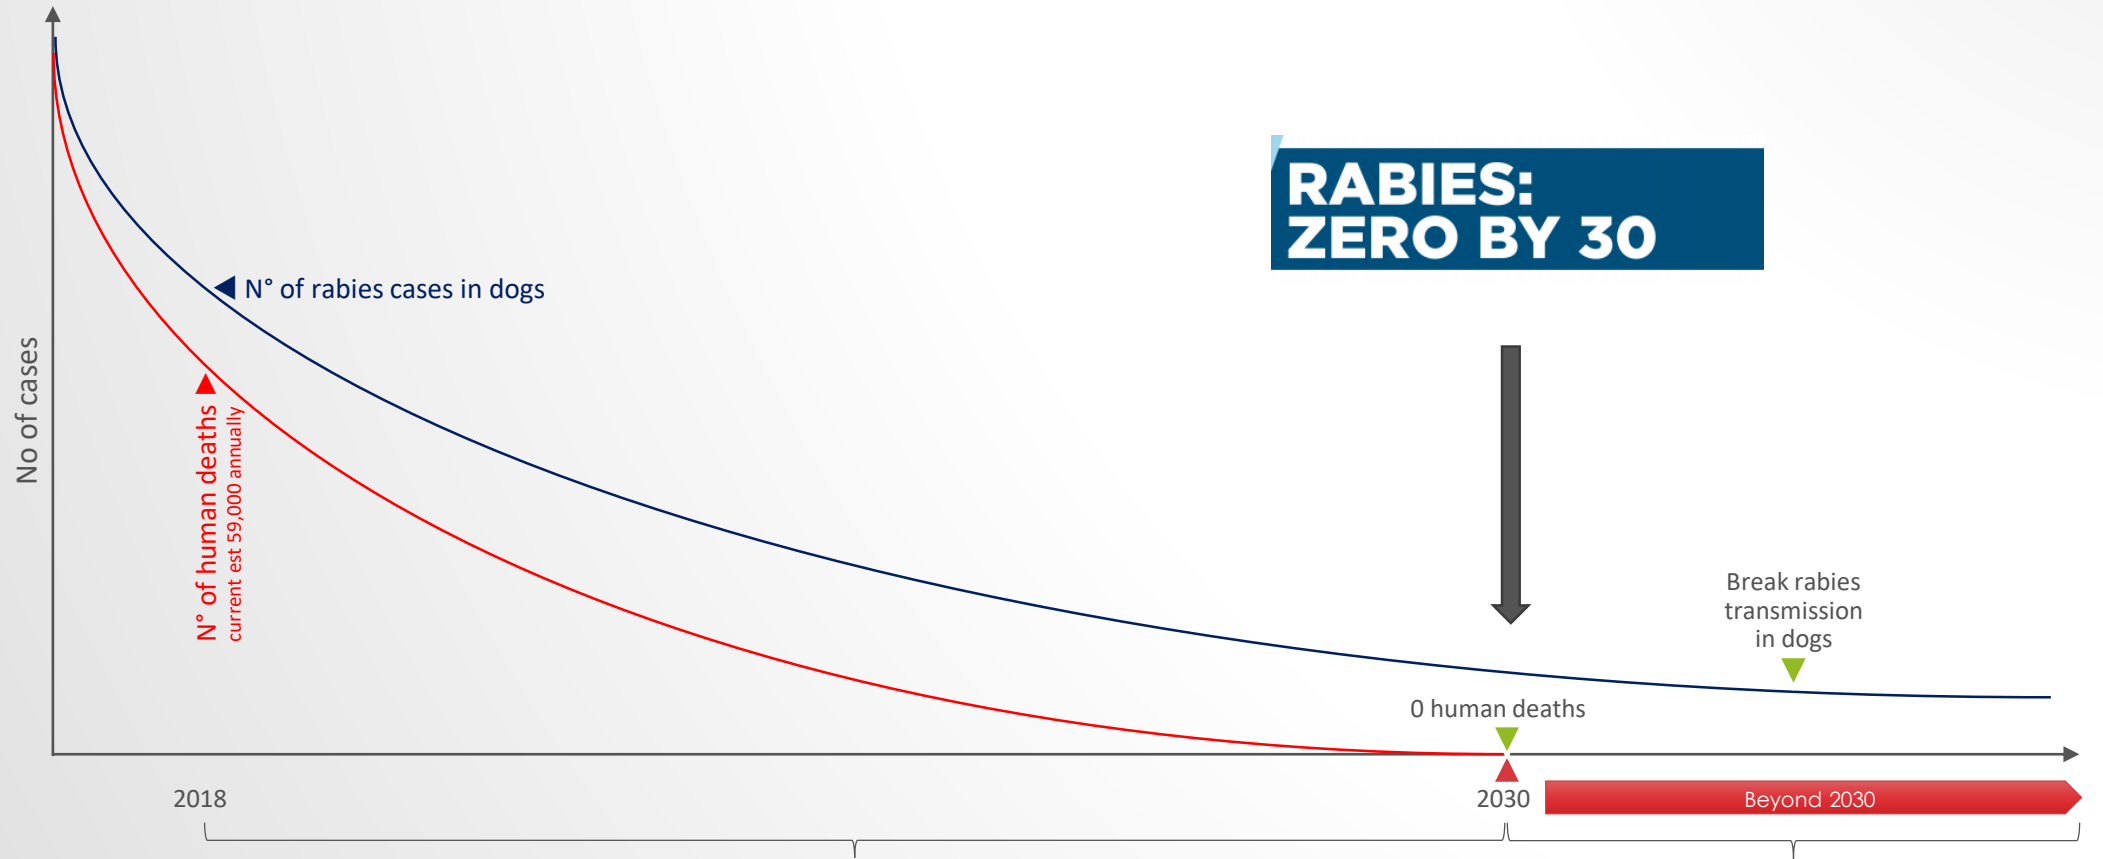

Improved availability and access to dog rabies vaccines (see Annex 4)

Local, regional and global reporting structures established to facilitate data collection and sharing

THE COST

THE EXPECTED TREND

BUT WHY ZERO BY 30?

‘No one will ever suffer in pain and die from this preventable disease.’

‘Investing in rabies strengthens health systems, improves equity and access to healthcare and contributes to sustainable development.’

Rabies elimination is feasible: the time to act is now.

YOUR CONTRIBUTION

- Engage with us to reach out the Goal
- Help us to spread the message and to identify potential investors
- Identify your responsibility
- Design, implement, evaluate and amend your national strategy
- Do not leave anybody behind (One Health)

Remain united against rabies

*United
Against
Rabies*

THANK YOU
