One WASH

**Our Contribution to the
GTFCC Cholera Road Map**

Red Cross & Red Crescent regularly responds to cholera

Preparedness and response:

Interventions before & during outbreaks

- Providing National, Regional and global capacities
- Preparedness/contingency plans, simulations
- Training of RC/RC National Societies staff/volunteers
- Response activities at community level
- Community case management and surveillance
- Clinical case management

Prevention/mitigation of risk

- Long term WASH and health programming in high risk areas (IFRC Global Water Sanitation Initiative & Community Based Health and First Aid)

The renewed and expanded IFRC emphasis on cholera control

One WASH is a recently established Global integrated approach to combine health; WASH; Nutrition and environmental sanitation in cholera ‘high risk’ areas.

One WASH focuses on two main actions that are closely interlinked and operate in full alignment with the ***GTFCC cholera road map***

- 1. Improve preparedness, early detection, and response to contain cholera outbreaks**
- 2. Deliver long-term integrated WASH/Health projects to prevent cholera and reduce morbidity and mortality**

18 National Societies

commit to implementing One WASH

Partners

commit to providing oversight and support the implementation

Donors

commit to supporting One WASH country plans

Improve early detection, preparedness and response to contain cholera

A long-term multi-sectoral approach to prevent cholera

Implementing One WASH Activities:

1. Improve preparedness, early detection and response to contain cholera outbreaks:

- Preparedness/contingency plans, SOPs, trained volunteers/staff, simulations, strategic stocks of key consumables.
- Community based surveillance for early detection and monitoring
- Community case management for early treatment (referrals, ORS-Ps)
- Prevention activities such as water treatment, hygiene and health promotion
- Support to OCV campaigns

Implementing One WASH Activities:

2. A long-term integrated WASH/Health approach to prevent cholera (typical project life span 3 to 5 years)

- Delivering sustainable long-term water, sanitation and hygiene programmes
- Integrating health and nutrition in WASH programmes
- Year-round health and hygiene behaviour change communication
- Advocacy and support to OCV campaigns when appropriate

Where are we now.....

- In consultation with Governments/UNICEF and other stakeholders at country level have prepared concept notes for 18 high risk countries (since mid-2017).
- One WASH, Phase 1 targets **5.5 Million** people in ‘high risk’ settings over the next 4 to 5 years at an estimated **120 M USD**.
- Initial One WASH projects now in inception period.
- RC/RC funding sources identified at up to **56 M USD over next 3 years**.

Where are we now... RC/RC funding sources

What is next.....

- Continue advocacy with both internal donors (RC/RC National Societies), potential external donors and fellow implementing partners.
- Monitor and support projects during inception and delivery phases.
- As donor interest gathers momentum we will develop more country proposals in detail.
- Monitor individual project sustainability and impact.
