MÉRIEUX FOUNDATION

Our mission: Strengthen local capacities to fight the infectious diseases that affect vulnerable populations in developing countries

¹ No Mériex Foundation office ² No on-going project

A BIT of ABOUT US:
The Foundation has extensive experience coordinating complex, multi-partner projects in diverse cultural and political contexts. It initiated the successful RESAOLAB program with health authorities in 7 West African countries, building laboratory system capacity and supporting the creation of government policy to sustain it.

The Foundation has led similar capacity building projects,

Public Health Initiative hosted at Fondation Mérieux, constituted of an Informal network of national and international stakeholders involved in enteric diseases management committed to help define and implement effective measures against cholera in their countries / regions

Objectives:

- Give the voice to the field through a bottom-up and transversal approach
- Foster interdisciplinary, multisectoral and cross-border interactions
- Be complementary and synergistic with other international and national actors WHO / GTFCC, UNICEF, DOVE.

Highlights

- 8 meetings/workshops in Africa and Asia followed by “IDEA releases” – First meeting started in 2011 and Last meeting was held in Hanoi, Vietnam in March 2017;
- 2 Publications and 1 publication and report in writing progress
- Partner of the Cholera renewed strategy launched during the high-level meeting held on May 25th during the World Health Assembly and followed by a case investment meeting on Oct 2017.

FMx joins the GTFCC GLOBAL TASK FORCE ON CHOLERA CONTROL
