

GLOBAL TASK FORCE ON
CHOLERA CONTROL

UPDATE ON THE IMPLEMENTATION OF THE *ENDING CHOLERA ROADMAP*

Dr Dominique LEGROS, WHO, February 2019

End Cholera as a
public health threat in
up to 20 countries;
reduce deaths by 90%
by 2030

How

The bridge

Country
level

2030 CHOLERA ROADMAP: COUNTRY DRIVEN IMPLEMENTATION ALONG 3 AXIS

1. Early detection and immediate response
to contain outbreaks
2. Multi-sectoral cholera elimination interventions
in targeted cholera hotspots
3. GTFCC partnership as a coordination
and country support mechanism

From preparedness and response to prevention and control

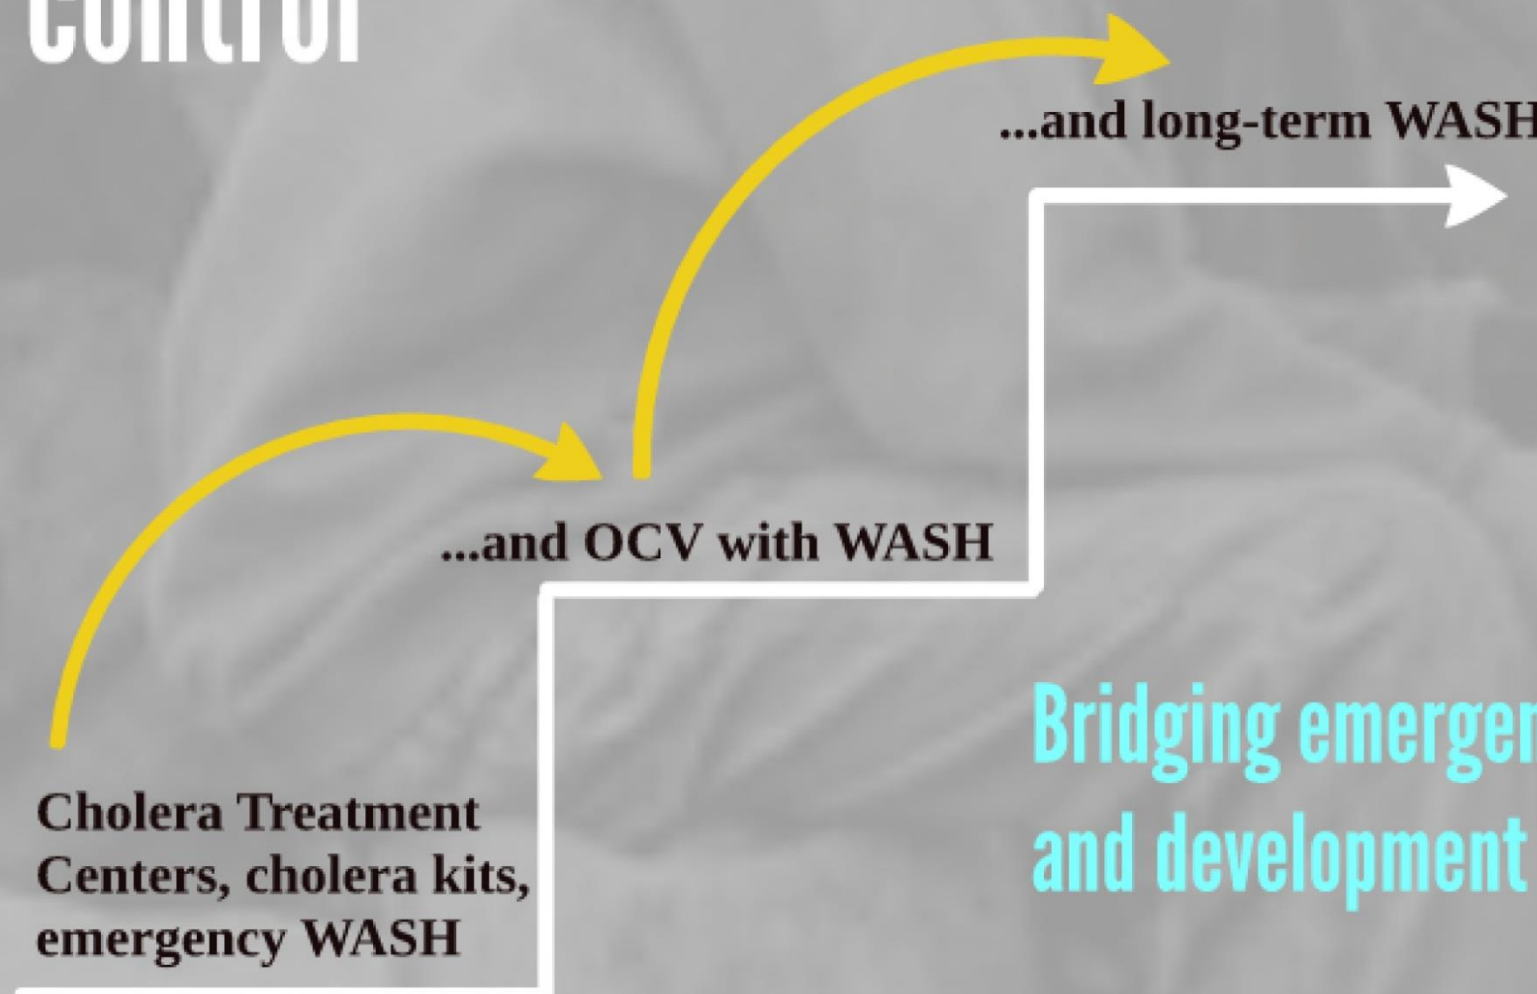

Treating patients alone has limited impact on transmission

Cholera Treatment Centers, cholera kits, emergency WASH

...and OCV with WASH

...and long-term WASH

Bridging emergency and development

UNPRECEDENTED ENGAGEMENT OF COUNTRIES, DONORS AND PARTNERS

DONORS AND PARTNERS ENGAGEMENT

Fondation Mérieux organisation of meetings

CDC technical support in countries

UNICEF engagement for support to coordination and to the investment case

IFRC One WASH project targeting cholera hotspots

MSF, SCF, Medair, IOM.... support for the implementation of OCV campaigns

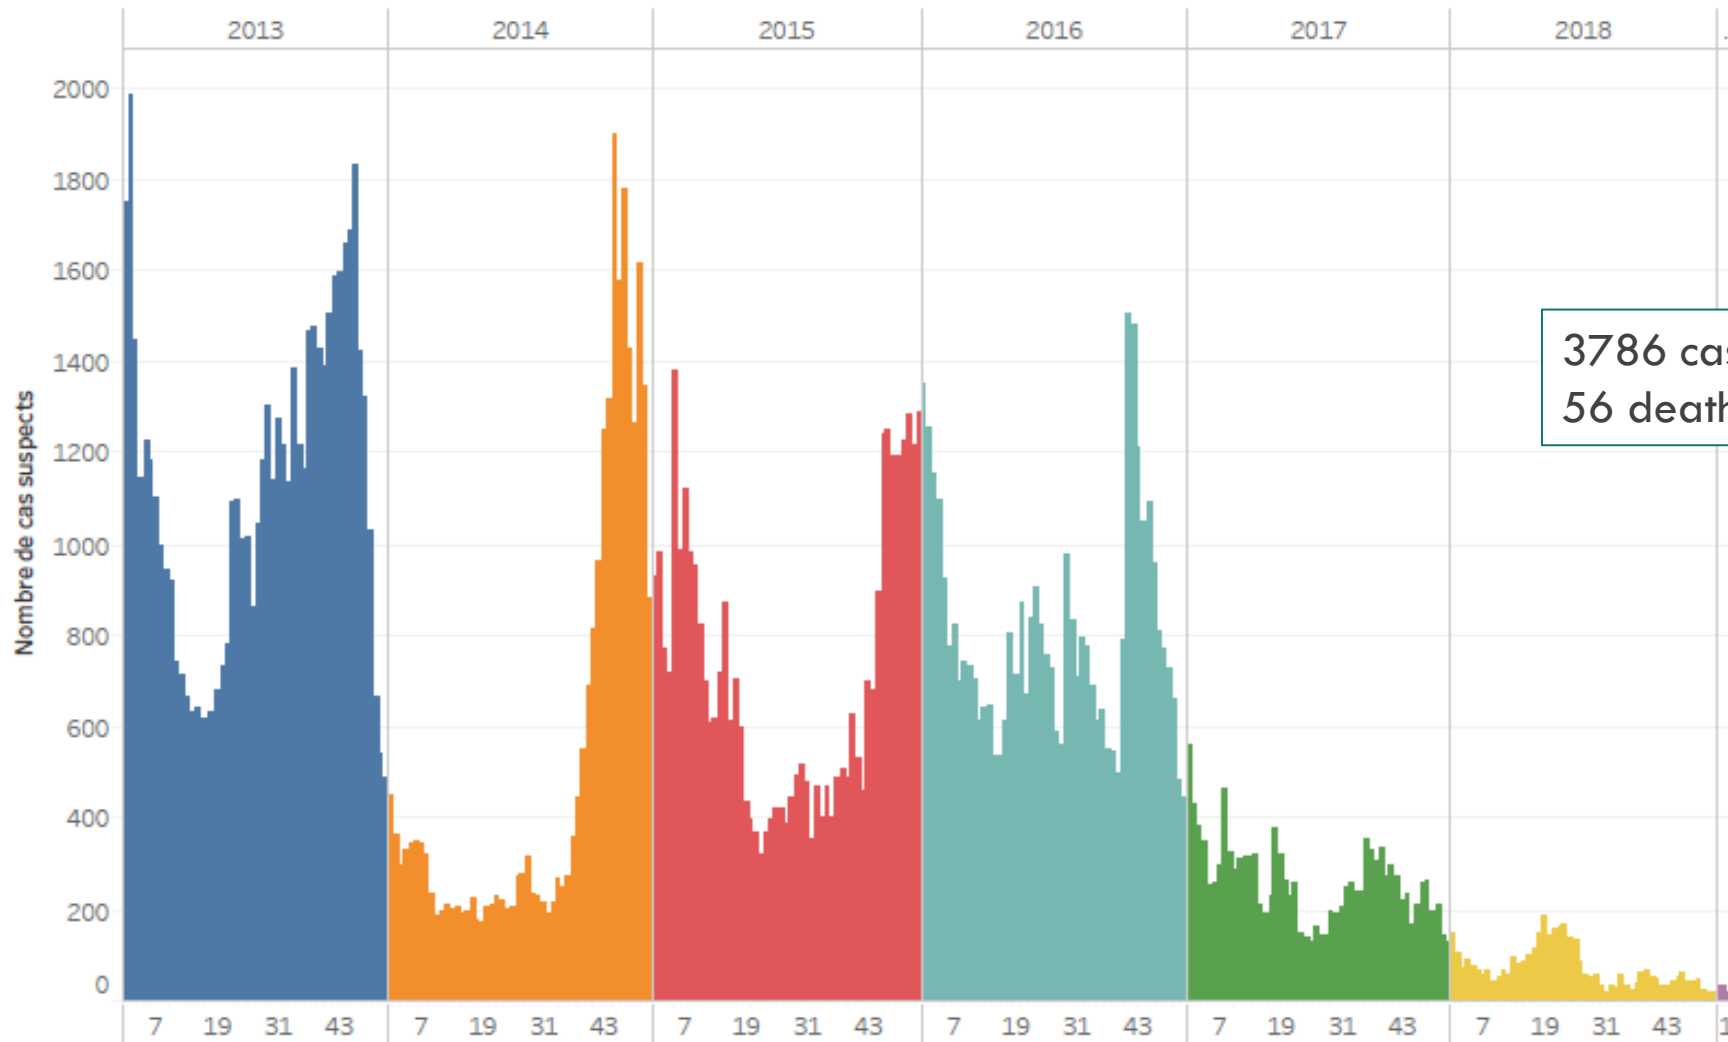

BMGF support to the GTFCC secretariat and the development of the investment case

GAVI support to OCV, technical assistance in countries, and surveillance

Welcome Trust and DFID support to research activities

Growing support from development donors for long term WASH projects in countries, focusing on cholera hotspots

HAITI IS MAKING PROGRESS...

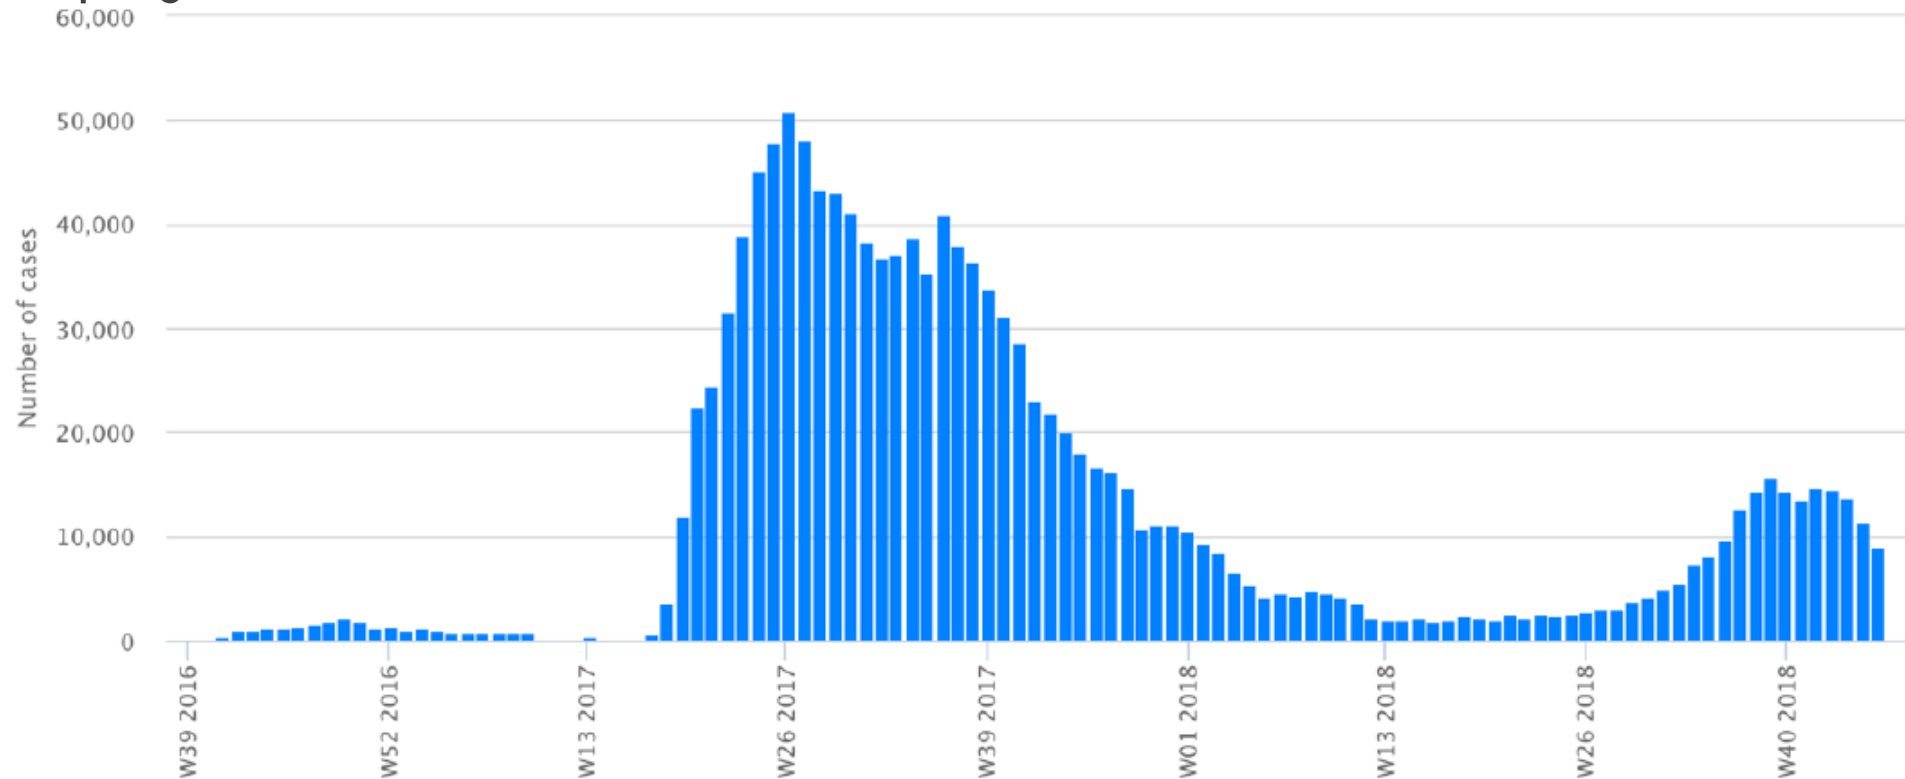

THE SITUATION IN YEMEN IS IMPROVING...

Outbreak spread much less in 2018 compared to 2017

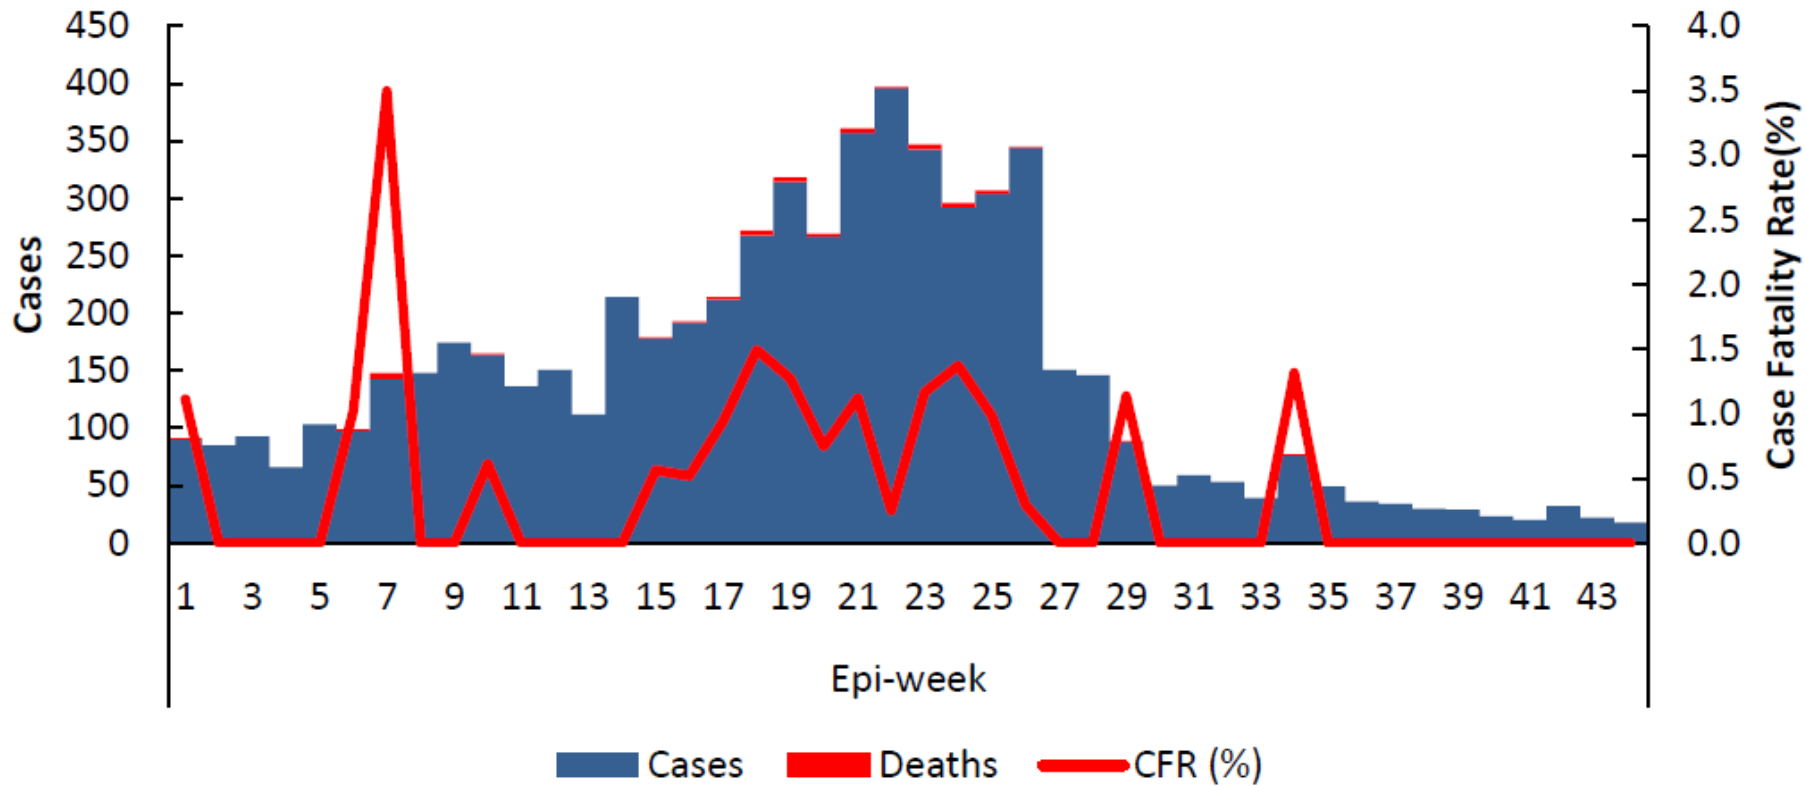

No extension when the rainy season started in July

Success of the OCV campaigns

THE SITUATION IN SOMALIA IS IMPROVING...

Fig 3. AWD/Cholera trends in Somalia from Wk1-Wk47, 2018

6605 cases
and 45 deaths
as of week 47, 2018

(75,414 cases and
1007 deaths
reported in 2017)

THE OCV CAMPAIGN AMONG ROHINGYAS IN BANGLADESH WAS A SUCCESS

 CrossMark

THE TRANSMISSION STOPPED IN SOUTH SUDAN SINCE END OF 2017

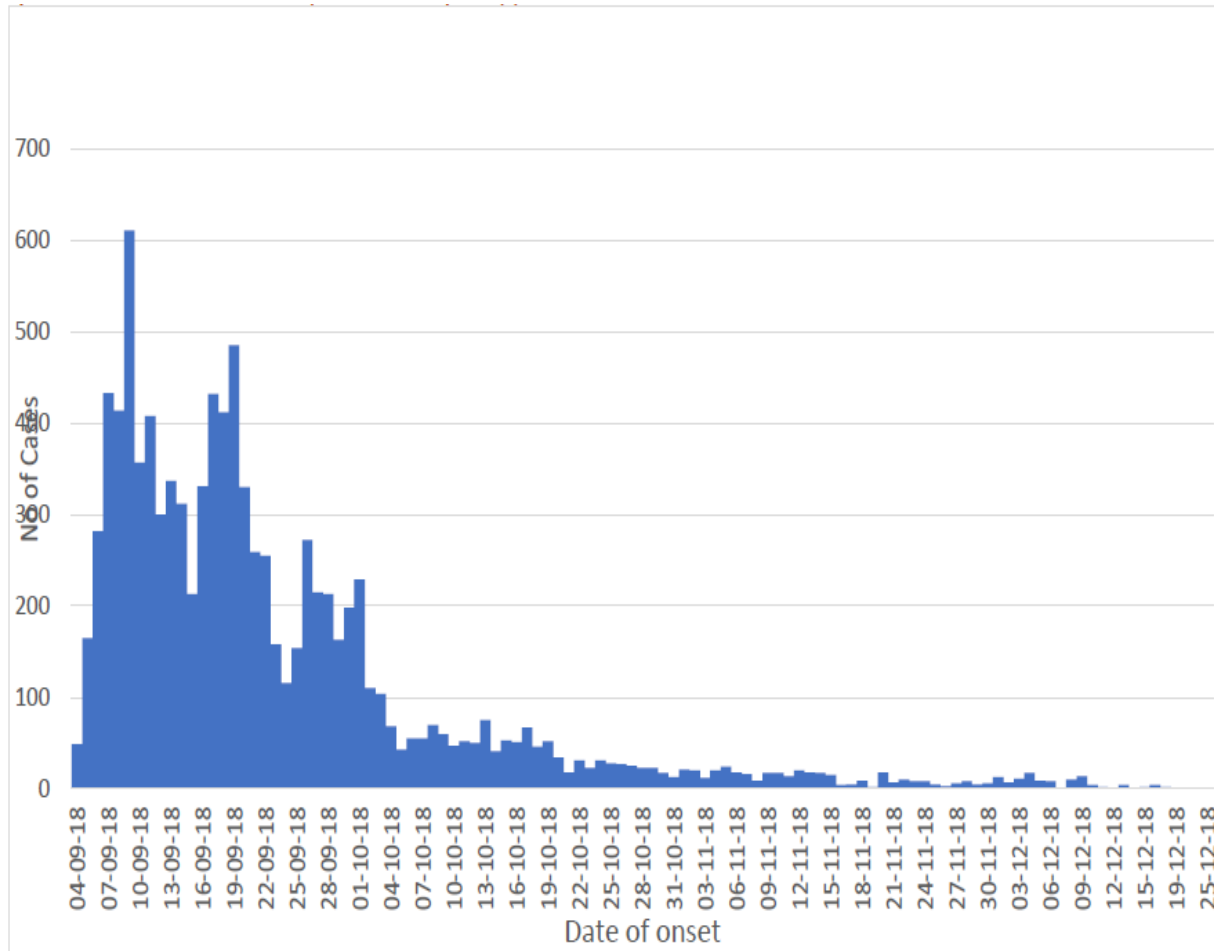

...AND IN NIGERIA

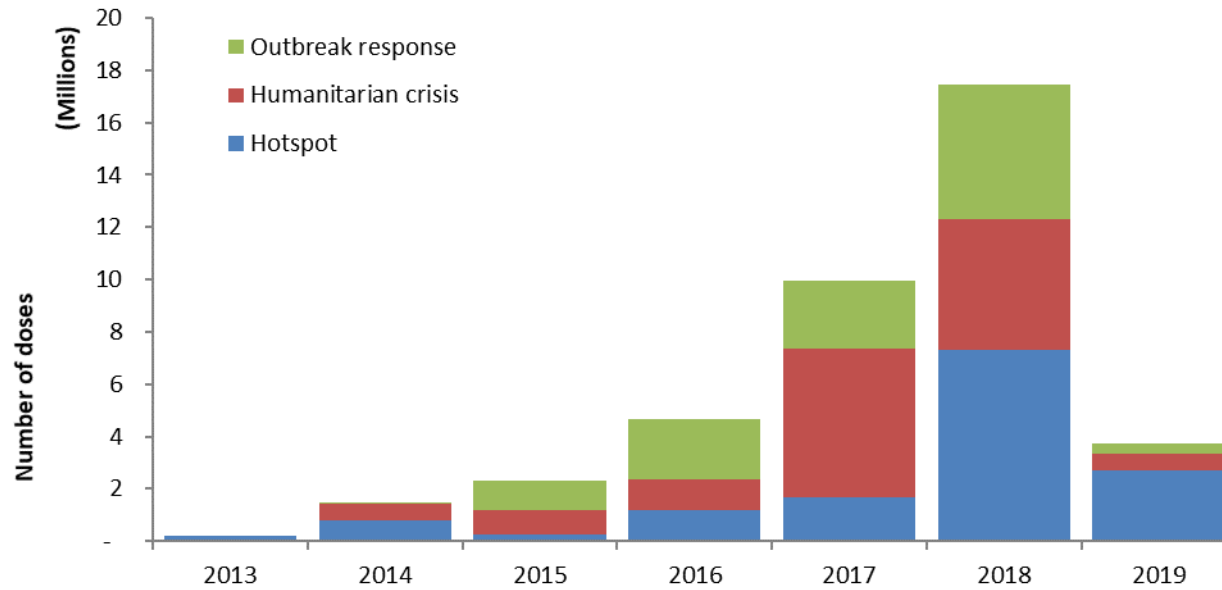

- No new cases reported in Borno State since Week 50, 2018 and Yobe since Week 48, 2018
- 6.2 M doses of OCV shipped in 2018 and 2019 for campaigns in Adamawa, Bauchi, Borno, Yobe states

THE OUTBREAK IN HARARE, ZIMBABWE WAS CONTROLLED WITHIN 2 MONTHS

- Harare : 9971 cases and 46 deaths reported, no new cases reported in 2019
- 1.2 million people vaccinated in October 2018
- Work continuing on long term planning and coordination of WASH activities

OCV USE GROWING EXPONENTIALLY

Year	Requested	Approved	Shipped
2013	204,500.00	204,500.00	204,500.00
2014	1,962,485.00	1,806,215.00	1,486,215.00
2015	4,419,127.00	2,502,634.00	2,502,775.00
2016	5,021,672.00	4,668,837.00	4,645,345.00
2017	21,800,653.00	16,037,537.00	9,979,595.00
2018	100,781,390.06	26,789,305.00	17,447,580.00
2019			3,751,667.00
Grand Total	134,189,827	52,009,028	40,017,677

SO, WHAT COULD MAKE THE ALL STORY FAIL ?

Lack of engagement of some key countries

- “Post outbreak”
- Political and financial

Lack of vaccines

Vaccines but no WaSH

Insufficient GTFCC capacities for in-country support

THE WAY FORWARD

Support priority countries to implement the roadmap

- Would require strong capacities of GTFCC to ensure in-country technical and managerial support

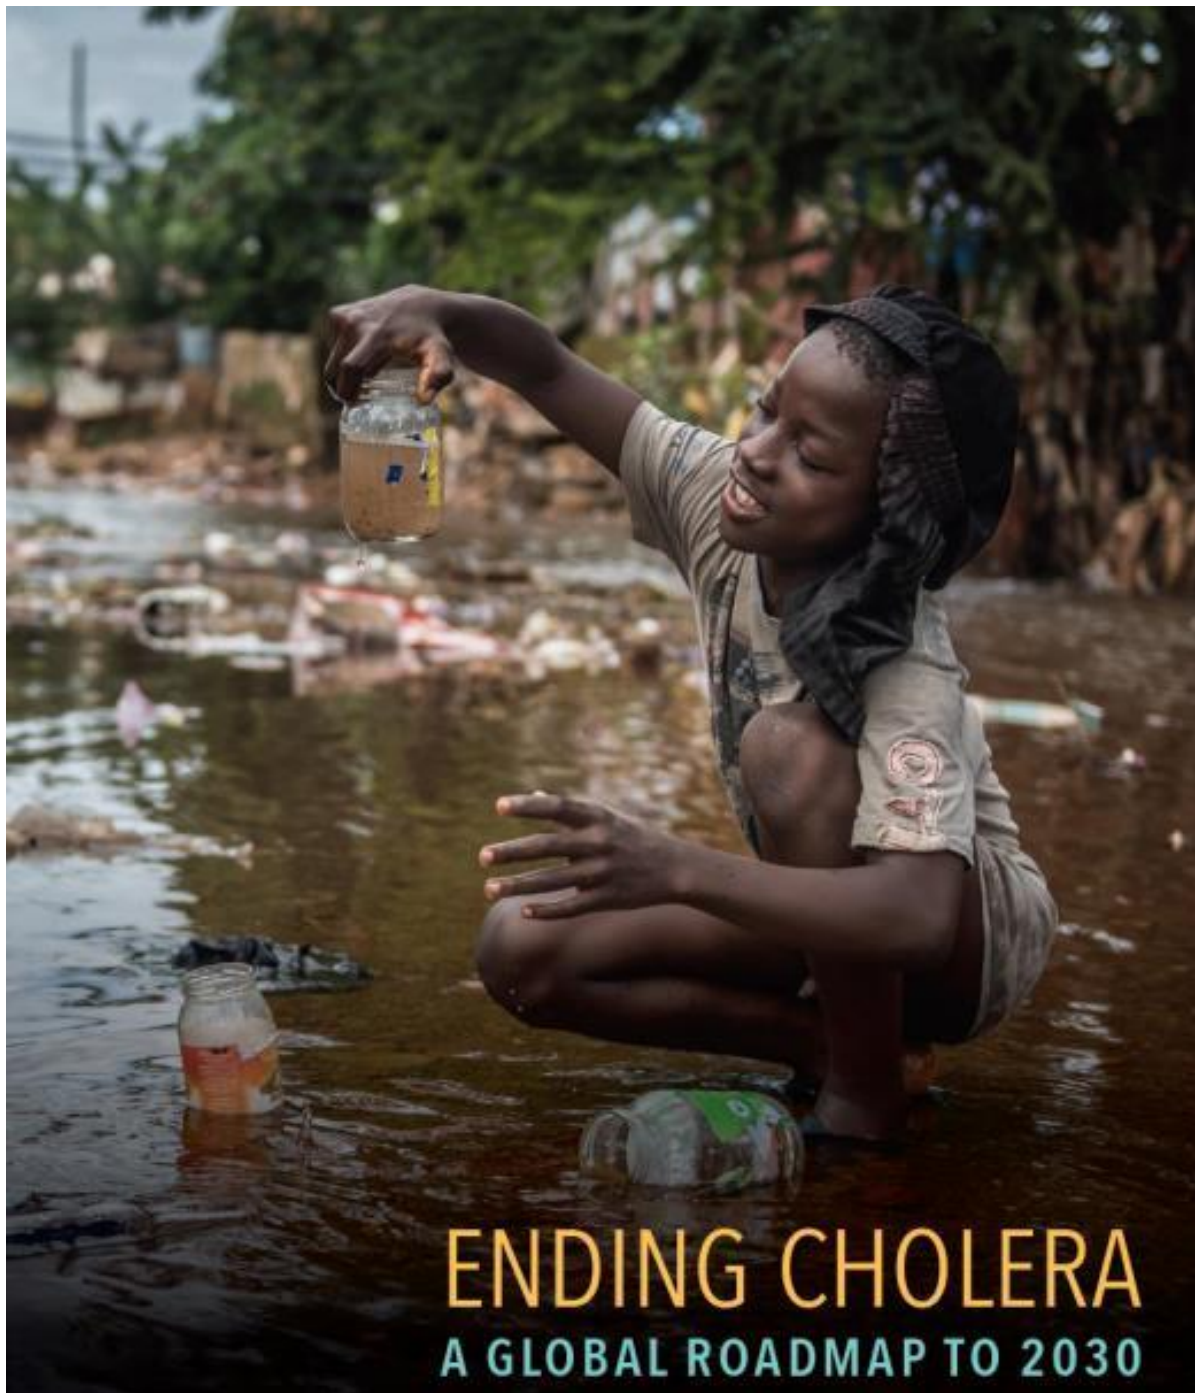

Improve coordination and leadership mechanisms at global level

- Adapt the GTFCC operational model for a better country support (Country Support Platform)
- Establish a GTFCC steering committee

Ensure strategic vaccine supply, tailored to the needs

- Ensure OCV are used at large scale, but in a strategic / preventive manner, as a trigger mechanism for sustained WaSH interventions, at least in stable countries
- Adapt the procedures accordingly

Publish and communicate on the investment case and advocate+++
