

GROUP WORK 1: WASH VULNERABILITY

1. What are the WASH factors that should be considered to contribute to the identification of hotspots to guide the development / targeting of National Cholera Plans (NCPs)?
2. How can these WASH factors be measured and assessed when conducting a situational analysis in cholera hotspots?
3. How should they be incorporated into the elaboration of an NCP to address gaps?
4. How can they be used to monitor progress along the Cholera Elimination Roadmap?
