

7th Vaccine Acceptance Meeting

Evidence based policy for vaccines - Update on current state of behavioural & social determinants of vaccination

Organized by Fondation Mérieux

*Les Pensières Center for Global Health
Veyrier du Lac - France*

September 23rd to 25th, 2019

Steering Committee:

- Katie Attwell
- Cornelia Betsch
- Eve Dube
- Arnaud Gagneur
- Saad Omer
- Valentina Picot
- Jonas Sivelä
- L. Suzanne Suggs
- Angus Thomson

- Cindy Grasso, Event Coordinator

des racines pour la vie • roots for life

Background

Background

Early in 2019, the World Health Organization labelled reluctance to receive recommended vaccines - despite the availability of vaccination services – as one of the 10 most important threats to global health. At the same time, global headlines reported a 300% increase in measles cases worldwide, with many outbreaks directly linked to vaccine acceptance.

Misinformation on the Internet and social media and the “anti-vaccine” movement are often blamed for vaccination programmes losing momentum. While public health organizations struggle with providing interventions to effectively promote vaccination at the population-level, many countries are considering implementing or tightening mandatory policies. Meanwhile, front-line vaccination providers need more support to address the vaccination concerns of patients in their practices.

There is an undeniable need for effective strategies to enhance vaccine acceptance and uptake in low, middle, and high-income settings. However, interventions must tackle the many drivers of vaccine acceptance and uptake, ranging from logistics (access to and awareness of affordable vaccines), to complex psychological, social, political and cultural factors. Fortunately, the field of research that is rigorously developing, implementing and evaluating interventions to address challenges around vaccine acceptance is growing rapidly.

Different initiatives are ongoing at the global level. The World Health Organization and UNICEF, along with other partners such as GAVI and the Gates Foundation, are creating a “hub for vaccine acceptance and demand” to better coordinate global efforts in the field. The new Vaccination Acceptance Research Network (VARN) is launching a global network of multi-disciplinary researchers and immunization program managers to address immunization program challenges and improve vaccination acceptance. Another initiative is this annual Vaccine Acceptance meeting in Annecy, France. Its success is highlighted by the creation of an informal community of practice that facilitates mutual learning and sharing of knowledge. Many initiatives and research projects have directly resulted from this meeting (see the special issue in Vaccine on outputs at <https://www.sciencedirect.com/journal/vaccine/vol/36/issue/44>).

This 7th meeting will once again bring people from diverse sectors together to discuss emergent vaccine acceptance challenges and evidence-informed ways to address them. The sessions will present different perspectives on strategies to enhance vaccine acceptance, ranging from training on vaccine acceptance, to policy interventions and vaccine mandates, to telling compelling stories about the importance of vaccination and efficacy.

Scientific Programme

Monday, September 23 rd 2019		
17:30-18:15	Registration	
18:15-18:40	Welcome addresses	Fondation Mérieux
18:40 -19:30	Keynote address: TBC	Todd Wolynn
19:30	Welcome Dinner	

Tuesday, September 24 th 2019		
Session 1	Rapid fire talks Chair: Jonas Sivela	
8:30-8:35	Introduction, rules of the game	Jonas Sivela
8:35-8:45	Understanding Measles Vaccine Hesitancy in Sudan	Majdi Sabahelzain
8:45-8:50	Discussion	
8:50-9:00	COM-B model to understand attitudes & access to paediatric & antenatal influenza, experienced by parents of children hospitalised for influenza	Samantha Carlson
9:00-9:05	Discussion	
9:05-9:15	A scoping review examining the availability of dialogue-based resources to support healthcare providers engagement with vaccine hesitant individuals	Holly Seale
9:15-9:20	Discussion	
9:20-9:30	Vaccine clinical trials in low-resource settings: perspectives from Uganda, Tanzania and Kenya	Machteld Van den Berg
9:30-9:35	Discussion	
9:35-9:45	Swedish government initiative to improve child protection against communicable diseases	Madelene Danielsson Sarah Earnshaw Blomquist
9:45-9:50	Discussion	
9:50-10:00	Text message interventions	Abdul Momin Kazi
10:00-10:05	Discussion	
10:05-10:15	Vaccine acceptance in parents in Diaple (Cote d'Ivoire)	Harvey Toure
10:15-10:20	Discussion	
10:20-10:25	Update on the Vaccine Safety Net developments	Cherstyn Hurley
10:25-10:30	Discussion	
10:30-10:50	Coffee Break	

Session 2	Vaccine mandates Chair: Katie Attwell	
10:50-11:10	Mandatory vaccination 5Ss: Scope, Sanctions, Severity, Selectivity and Salience	Katie Attwell
11:10-11:20	<i>Discussion</i>	
11:20-11:40	TBD	Mark Navin
11:40-11:50	<i>Discussion</i>	
11:50-12:10	The politics, policy and epidemiology of mandates in the US and Europe	Saad Omer
12:10-12:20	<i>Discussion</i>	
12:20-14:00	<i>Group Picture and Lunch</i>	
Session 3	Diverse perspectives on vaccine acceptance Chairs: L. Suzanne Suggs	
14:00-14:20	Views of complementary and alternative health practitioners	Michael Deml
14:20-14:30	<i>Discussion</i>	
14:30-14:50	Increasing demand for vaccination: kids as 'change agents'	Ian Roe
14:50-15:00	<i>Discussion</i>	
15:00-15:20	Increasing Vaccination: Lessons from Behavioural Science	Hugo Harper
15:20-15:30	<i>Discussion</i>	
15:30-16:00	<i>Coffee break</i>	
16:00-16:20	The EMMIE program: A successful governmental educational program to increase vaccine acceptance in Quebec	Arnaud Gagneur
16:20-16:30	<i>Discussion</i>	
16:30-16:50	Design and evaluation of a branded narrative story-based intervention to promote HPV	W. Doug Evans
16:50-17:00	<i>Discussion</i>	
17:00-17:05	Update on the work of the WHO working group on Measuring Behavioural and Social Drivers (BeSD) of Vaccination	Julie Leask Lisa Menning
17:05-17:10	<i>Discussion</i>	
17:10-17:15	Update on the work of the Vaccine Acceptance Research Network (VARN)	Dorothy Peprah
17:15-17:20	<i>Discussion</i>	
19:30	<i>Dinner</i>	

Wednesday, September 25th 2019

Wednesday, September 25th 2019		
Session 4	Vaccination systems resilience & demand Chairs: Eve Dubé & Angus Thomson	
8:30-8:50	Exploring pathways for building trust in vaccination and strengthening health system resilience	Sachiko Ozawa
8:50-9:00	<i>Discussion</i>	
9:00-9:20	National Level: experience with the Danish HPV safety crisis. Addressing HPV vaccine hesitancy in Denmark	Bolette Søborg
9:20-9:30	<i>Discussion</i>	
9:30-9:50	High-impact, resilient and equitable: an update on vaccination demand strategies from WHO HQ	Lisa Menning
9:50-10:00	<i>Discussion</i>	
10:00-10:20	Vaccines for a resilient immunization system – an industry perspective	Imraan Munshi
10:20-10:30	<i>Discussion</i>	
10:30-11:00	<i>Coffee Break</i>	
Session 5	Training in vaccine acceptance Chair: Arnaud Gagneur	
11:00-11:05	Introduction	Arnaud Gagneur
11:05-11:25	Implementation of announcement approach training for US providers	Noel Brewer
11:25-11:35	<i>Discussion</i>	
11:35-11:55	P3-MumBubVax: Development of a multi-component antenatal intervention to promote maternal and childhood vaccine uptake in Australia	Jessica Kaufman Margie Danchin
11:55-12:05	<i>Discussion</i>	
12:05-12:25	Vaccine trust masters training program: the international pediatrics association	Naveen Thacker
12:25-12:35	<i>Discussion</i>	
12:35-14:00	<i>Lunch</i>	
Session 6	Workshops: telling compelling stories & resilience index Chair: Cornelia Betsch	
14:00-16:00	Workshop 1: Telling compelling stories	Facilitator: Suzanne Tesselaar
	Workshop 2: Resilience in Immunisation	Facilitator: Julie Leask
16:00-16:30	<i>Summing up and closing of the meeting</i>	SC Members
