

# Consultation Meeting for Operationalizing a One Health Approach for Vector Borne Diseases in the Context of Climate Change

17-18 Dec 2019, Brazzaville, Congo

## Summary and Recommendations

# SUMMARY

- ✓ Informed about the Libreville Strategic Action Plan to Scale Up Health and Environment Interventions in Africa (2019-2029)
- ✓ Knowledge on how research products from the TDR IDRC Research Initiative on VBDs and climate change can be aligned with and contribute to the Strategic Action Plan to Scale Up Health and Environment Interventions in Africa (Libreville 2019-2029)
- ✓ Discussed and provided input/feedback to the **draft plan** for Operationalizing a One Health approach
  - Metrics-based assessment (scorecard)
- ✓ Country scenario setting – for pilot testing the metrics based assessment system
- ✓ Research and capacity building needs for operationalizing One Health approach to VBDs and Climate Change

# Recommendations

- Revise the draft plan with input from participants
- **Call to action** – (testing the draft plan and the application of the metrics based assessment tool)
  - To contribute to the 2019-2029 Libreville Strategic Action Plan by operationalizing a One Health approach in Africa for the control of VBDs in the context of climate change
- Request TDR (and partner/s) to support the testing of the draft plan
  - Funding support for project/s
  - Plan of work (activities, timeline) for 2020/2021
