

2022 Focus Areas

- Engage local authorities
- Maintain rabies in OH agenda
- Facilitate knowledge transfer
- Engage, empower and facilitate work of national stakeholders
- Expand and engage membership
- Engage wider health development community

Important points to focus on

- Need to improve surveillance
- Supporting countries in NSP development/implementation/endorsement
 - ID countries to support, template
- Engaging more networks
- Involvement of cities/local authorities
- Many tools available – how to make these available and user-friendly

Next steps

- Minimum Data Elements: webinars and infographics, understanding why countries don't report
- Tool evaluation: submission and evaluation process, training on evaluation, linking with roadmap, canine rabies blueprint
- Partnership map:
- RDT/ORV: Guidelines for stakeholders, linked to international standards
- Roadmap: Link to tools and SARE, SARE facilitator training (in progress),
- NSP/WOAH: Support countries in developing dossier and paying fees
- Dog vaccination/ORV: Clear guidance, recommendations, need a decision making tool for stakeholders
- Case studies: Highlight importance of international reporting/surveillance
- WG3: Connect with networks, local authorities
