

STRATEGIC PLAN-SIHI GHANA HUB

LOCATION: School of Public Health, College of Health Sciences, University of Ghana

VISION OF SIHI IN GHANA

Our vision as a member of the SIHI community is to integrate social innovations into health care delivery to increase Universal Health Coverage and progress towards achieving Sustainable Development Goals

MISSION OF SIHI IN GHANA

The mission of Social Innovation in Health (SIHI) in Ghana, is to initiate and promote social innovations in Ghana and West Africa through research, training, practice, advocacy and community empowerment to address challenges in health care delivery, whilst improving quality of care.

LONG TERM GOALS

1. To institutionalize SIHI in public health training, as well as delivery of care in Ghana and other West African countries
2. To develop curriculum on social innovations in health
3. To create a critical mass of SIHI advocates, researchers and practitioners

CORE VALUES

1. **Leadership**-providing leadership and mentorship in social innovations in health
2. **Collaboration**-collaborating with SIHI global and local institutions on social innovations in health
3. **Innovation**-new approaches and lens to health care delivery and research
4. **Passion**-committed to wellbeing of the vulnerable and socially marginalized
5. **Engagement**-community engagement in health interventions

ACTION PLAN

1. **IDENTIFY AND RESEARCH:** We aim to search, Identify and research into social innovations that affect the quality of health delivery in Ghana. We also seek document, study and research into new innovations that will positively impact the healthcare delivery in Ghana
2. **DEVELOP AND CONNECT:** We help develop the social innovative Ideas identified so they can meet the challenges of delivering health care. We also provide the enabling platform organizations, corporate bodies and Individuals to share ideas on health delivery in Ghana
3. **SUPPORT AND GUIDANCE:** We offer the needed guidance and assistance to individuals, organizations and other social innovators to enhance their capacities in research and other related fields in social innovations in health.
4. **ADVOCACY AND AGENDA SETTING:** We offer advocacy and initiate processes to make social innovation in health a national discourse for researchers, policy makers and implementers.
