

QIAGEN Overview

Who we are

QIAGEN is a provider of molecular and other diagnostic platforms, automation systems, bioinformatics and sample and assay technologies for applied testing, academic and pharmaceutical research. QIAGEN has 35 subsidiaries in over 25 countries and has a global network of distribution partners in more than 60 countries.

What we do

QIAGEN's corporate mission is "to making improvements in life possible" and for nearly a decade, QIAGEN has been a staunch member of the TB elimination movement through advocacy, education, promoting global recommendations and providing innovations for latent TB testing. QIAGEN partners with national tuberculosis directors, staff, research institutions, and key opinion leaders across numerous LMICs. QIAGEN has also has strong relationships with the academic and operational research scientists that provide epidemiologic data to local communities needed for implementing TB programs.

QIAGEN is committed to improving access to TB assays to those who need it the most and are looking for partners who can help scale-up efforts for LTBI testing while moving more swiftly than traditional mechanisms.

Where we are

QIAGEN's global headquarters is in Hilden, Germany. However, the global headquarters for the Immune Franchise and TB diagnostics is located in its North America regional location in Germantown, Maryland.

Expectations from the workshop

- Get an in-depth understanding of SIHI and its partner's work
- Determining whether there are opportunities for a QIAGEN partnership within SIHI to enhance sustainable implementation of disease control strategies at the community level
- Meet like-minded partners
