

## Roche Overview

*\*This document is written by SIHI Secretariat on behalf of Roche.*

### Who we are

Roche Diagnostics is a global pioneer in diagnostics focused on advancing science to improve people's lives. The Diagnostics Division is one of the world's leading providers of diagnostic systems and solutions for hospitals, laboratories, and doctors' practices. The combined strengths of pharmaceuticals and diagnostics under one roof have made Roche the leader in personalised healthcare – a strategy that aims to fit the right treatment to each patient in the best way possible.

### What we do

Roche's philanthropic endeavors include supporting humanitarian and social development efforts, strengthening communities, investing in science and education, and supporting the arts. The aim is to apply simple measures that result in lasting improvements for society by selectively developing and supporting innovative solutions and by applying our core knowledge together with partners. Part of their endeavors in the health sector include providing support for the International Committee of the Red Cross, Transnet-Phelophepa Healthcare Trains, and integration of local and national capacity to implement Healthcare System Strengthening by training, community-based inclusion and empowerment.

Roche also implements the [Global Access Program](#) which is a systematic approach to enable access to essential diagnostics and Healthcare Development at affordable prices for LMIC. Roche has collaborated with various organizations and institutions such as UNAIDS, CHAI, Unitaid, the U.S. President's Emergency Plan for AIDS Relief (PEPFAR), Global Fund, and Centres for Disease Control (CDC) to establish the Global Access Program.

### Where we are

Roche has offices and affiliations worldwide. The main location of Roche Diagnostics International is in Rotkreuz, Switzerland.

### Expectations from the workshop

- Learn and share mutual experience from foundations and the private sector
- Explore potential partnerships between Roche and other global health actors and stakeholders
