

Covid19 Vaccine introduction Scenario in Argentina: Challenges & Opportunities

“The impact of vaccination on the health of the world’s people is hard to exaggerate.

With the exception of safe water, no other modality has had such a major effect on mortality reduction and population growth”

Susan and Stanley Plotkin

“The impact of vaccination on the health of the world’s peoples is hard to exaggerate. With the exception of safe water, no other modality has had such a major effect on mortality reduction and population growth”

“What looks simple on retrospective, it was much complicated than you thought

Susan and Stanley Plotkin

❖ WE NEED THE VACCINE TO BE **ADMINISTERED**

WE NEED THE VACCINE TO BE ADMINISTERED

MAJOR CHALLENGES

Access and availability of vaccines

In-Country decisions to include a vaccine

Planning and implementation of Immunization Programs

Manufacturing process

Vaccine supply and logistics

Delivery of vaccines in LMIC – equity

Vaccine uptake

Daily new confirmed COVID-19 cases

Shown is the rolling 7-day average. The number of confirmed cases is lower than the number of actual cases; the main reason for that is limited testing.

Our World
in Data

ADMINISTERED VACCINES IN ARGENTINA BY RISK GROUP

<https://www.argentina.gob.ar/coronavirus/vacuna/plan-estrategico>

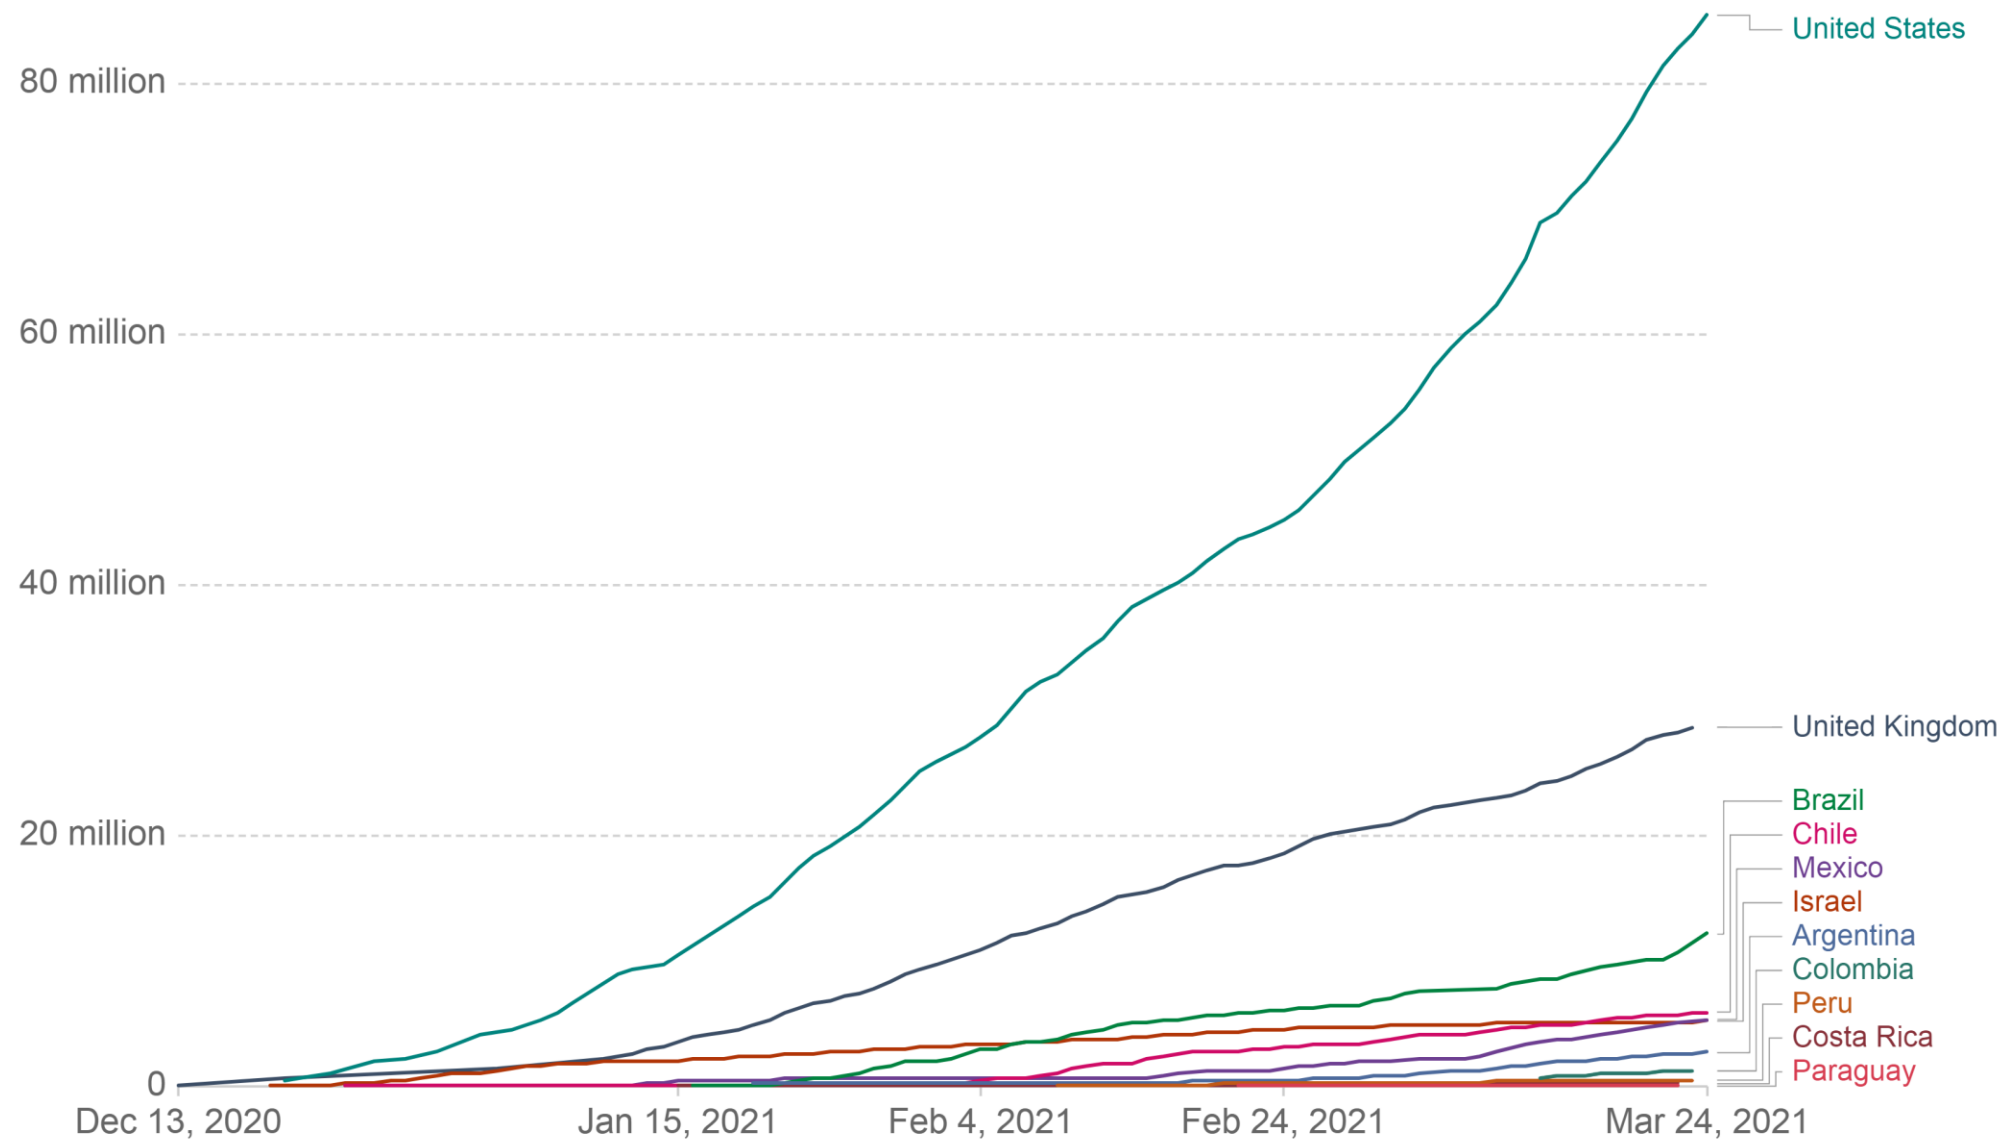

Share of the population fully vaccinated against COVID-19

Share of the total population that have received all doses prescribed by the vaccination protocol. This data is only available for countries which report the breakdown of doses administered by first and second doses.

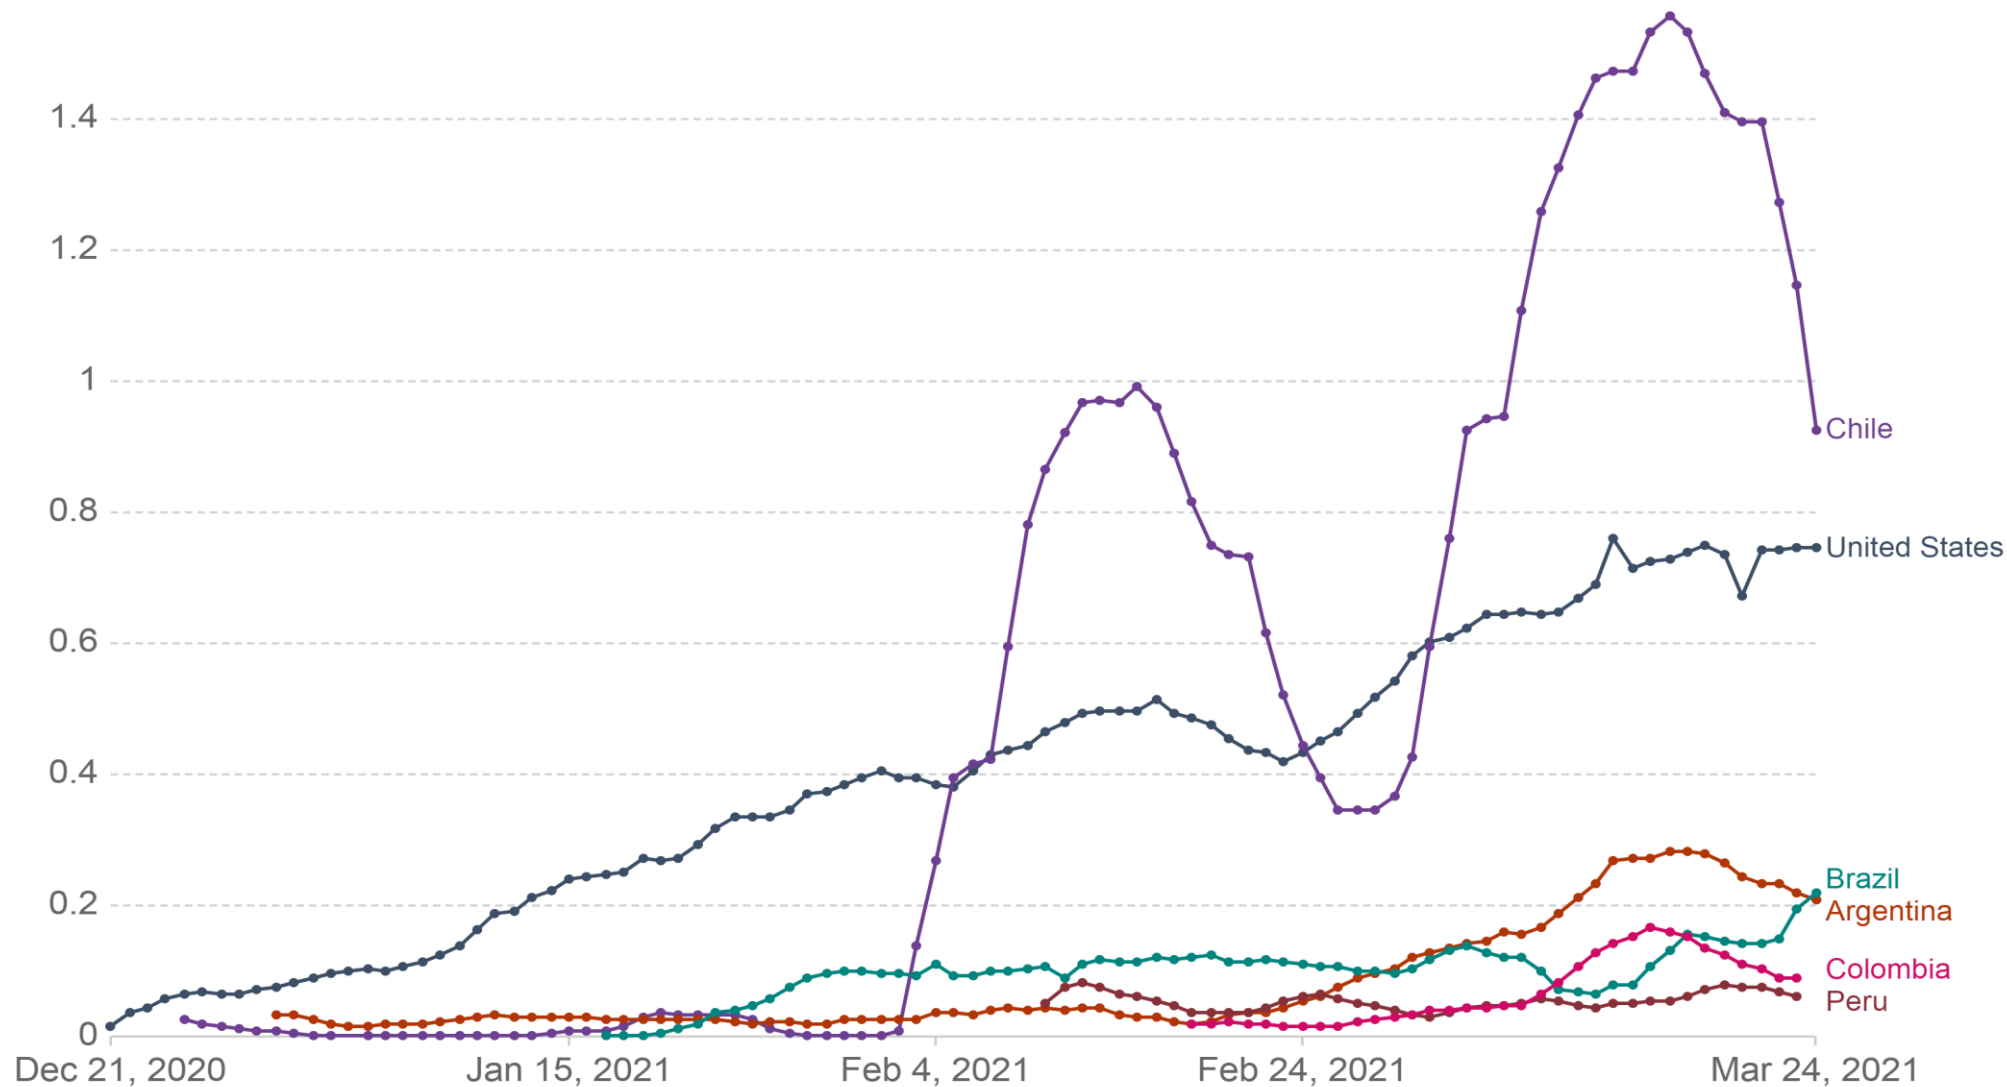

Number of people who received at least one dose of COVID-19 vaccine

Total number of people who received at least one vaccine dose. This may not equal the number of people that are fully vaccinated if the vaccine requires two doses.

Daily COVID-19 vaccine doses administered per 100 people

Shown is the rolling 7-day average per 100 people in the total population. This is counted as a single dose, and may not equal the total number of people vaccinated, depending on the specific dose regime (e.g. people receive multiple doses).

WE NEED THE VACCINE TO BE ADMINISTERED

Vaccine uptake = Communication – vaccine advocacy
